

VISHAKHA SHARMA

Quality Control (QC) Analyst – Content Variation | B.Tech Computer Science Engineering

8171362687 | sharmavish25@gmail.com | Delhi Road, Meerut, 250002 | [linkedin.com/in/vishakha-sharma25](https://www.linkedin.com/in/vishakha-sharma25) | github.com/Vish-Sharma07

PROFESSIONAL SUMMARY

Quality Control Analyst with experience validating content-variation datasets and workflow outputs for AI training operations. Skilled in dataset validation, discrepancy analysis, quality reporting, Advanced Microsoft Excel, SQL, and process documentation. Promoted internally from Associate Analyst for consistent operational performance and quality-process contributions.

QUALITY CONTROL HIGHLIGHTS

- Conduct dataset validation, condition-based scenario evaluation, discrepancy identification, corrective-action tracking, and quality reporting for AI training workflows.
- Review content-variation outputs against defined standards and document structured quality outcomes for cross-functional stakeholders.
- Support data integrity through Excel-based trackers, quality reports, and operational dashboards.

WORK EXPERIENCE

Quality Control (QC) Analyst – Content Variation | HighSpring India

July 2026 – Present

- Selected via Internal Job Posting (IJP) for the QC Analyst role within the Content Variation process, in recognition of consistent performance and process contributions as an Associate Analyst
- Perform quality control checks and reviews on content variation datasets and workflow outputs to ensure accuracy, consistency, and adherence to defined standards
- Evaluate condition-based scenarios against quality benchmarks and document structured outcomes using internal business tools
- Identify discrepancies and process gaps during quality review; recommend and track corrective actions to improve overall process accuracy
- Collaborate with cross-functional teams to validate data quality standards for AI model training workflows
- Maintain quality reports, trackers, and dashboards to provide management with reliable, up-to-date quality insights
- Communicate quality findings and status updates clearly across teams, demonstrating strong written and verbal communication skills

Associate Analyst – Operations | HighSpring India

2025 – June 2026

- Analyzed operational and project data to identify trends and support accurate, timely business decisions
- Reviewed, cleaned, and validated large datasets using MS Excel across multiple project phases — ensuring data integrity and consistency
- Evaluated condition-based scenarios and documented structured outcomes using internal business tools
- Assisted in data preparation and quality checks for AI model training workflows, coordinating with cross-functional teams
- Maintained reports, trackers, and dashboards to provide management with reliable and up-to-date operational insights
- Identified data inconsistencies and process gaps; recommended corrective measures that improved reporting efficiency
- Communicated findings and status updates clearly across teams, demonstrating strong written and verbal communication skills
- Adapted quickly to new tools, processes, and project requirements in a fast-paced work environment

TECHNICAL SKILLS

Data Quality & QC: Dataset validation, quality review, discrepancy analysis, condition-based evaluation, corrective-action tracking, quality reporting

Analytics: Advanced Microsoft Excel, SQL, Python, data analysis, dashboard reporting

AI Operations: AI model training workflow support, process documentation, cross-functional coordination

Development: React.js, JavaScript, Tailwind CSS, Git, GitHub

PROJECTS

Operational Data Dashboard | React, Tailwind CSS, Vite, JavaScript

Live: <https://Vish-Sharma07.github.io/operational-dashboard/>

- Built a React-based web application that ingests CSV data and renders an interactive operational dashboard with real-time charts and filters
- Implemented donut chart (task status), bar chart (department-wise), sortable data table, live search, and status filter functionality
- Designed clean, responsive UI using Tailwind CSS — deployed live on GitHub Pages
- Directly inspired by current role — mirrors the kind of data tracking, validation, and reporting done day-to-day at HighSpring India

Resume Analyzer – AI-Powered Web Application | React, JavaScript, HTML, CSS

- Built a React web app that analyzes resumes against job descriptions, extracting skill gaps and ATS compatibility insights
- Designed structured feedback output for improved candidate shortlisting with clean, user-friendly interface

Job Application Tracker | React, JavaScript, HTML, CSS

- Developed a full-featured CRUD application to manage job applications with status tracking and responsive UI
- Integrated dark mode and LocalStorage-based data persistence

EDUCATION

B.Tech – Computer Science Engineering | Vidya College of Engineering | 2021–2025 | CGPA: 7.67 / 10

Class XII – CBSE | Vardhman Academy | 2021 | 89.6%

CERTIFICATIONS

- Microsoft – Azure Fundamentals
- TCS iON – Young Professional
- CDAC – Big Data Technology
- Honeywell – Cybersecurity

ACHIEVEMENTS & EXTRACURRICULARS

- 5-Star HackerRank rating in Python and C++
- LeetCode 50-Day Challenge – completed consecutively in January and February
- Solved 200+ DSA problems across LeetCode and HackerRank | TCS iON Badge Holder
- Ex-NCC Cadet – Zonal Winner (AKTU): Gold in Relay | Silver in Volleyball & Kabaddi
